

Survey of Crematoria in the British Islands 2022

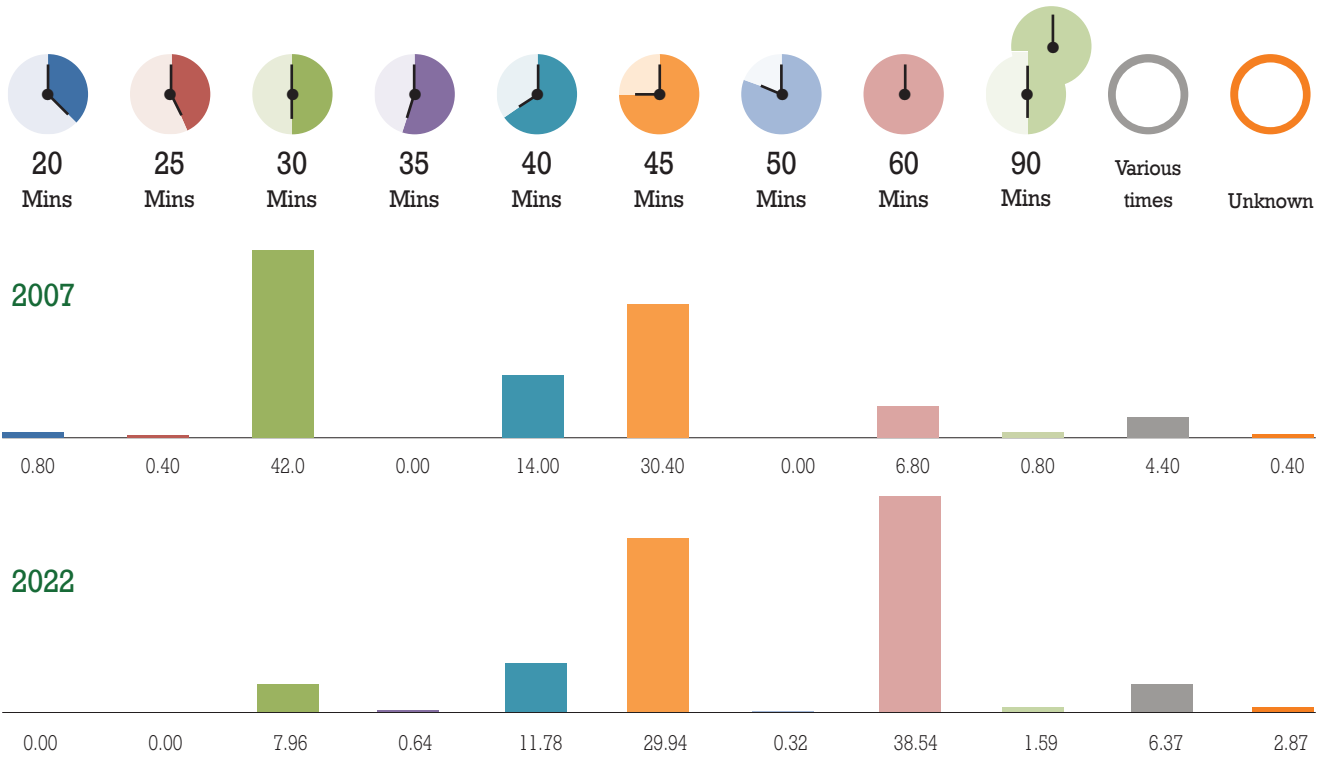

Each year, The Cremation Society carries out a survey of all crematoria in the British Islands, to track the latest information on up-to-date services and facilities offered. This enables us to follow any trends across crematoria and highlight any new practices emerging. Thank you once again to all crematoria for returning their data to us.

The following information is based on the information provided by all 314 crematoria surveyed (unless otherwise shown) and where no information was provided or the crematoria were unable to answer the question, this is shown as 'unknown'. This enables you to see the complete picture based on information from 100% of the crematoria surveyed. We asked crematoria to provide their

information based on their usual practices, and not on any revised practices introduced during the COVID-19 pandemic. Where an earlier comparative figure is provided, this is based either on the earliest data published in *Pharos International* in 2007 or where a subject was not surveyed in 2007, then the earliest date for which information is available.
