

UK Crematoria Survey

2007-2012 Comparisons

Each year the Society surveys all the crematoria in the UK to obtain information about fees, learn more about existing practices and facilities and to identify any new trends that may be emerging. Following the return of the 2012 questionnaire we have compared this with the situation as it was in 2007 and some interesting facts emerge.

For comparative purposes, where a subject was not covered in 2007, the earliest date for which information is available is shown.

The Society is extremely grateful for the information provided by crematoria and hopes it will be of interest to them and provide a picture of an evolving cremation movement.

Crematoria Service Times
