

# UK Crematoria Survey

Each year the Society surveys all the crematoria in the UK to obtain information about fees, learn more about existing practices and facilities and to identify any new trends that may be emerging.

Following the return of the 2014 questionnaire we have compared this with the situation as it was in 2007 and some interesting facts continue to emerge. For comparative purposes, where a subject was not covered in 2007, the

earliest date for which information is available is shown. The Society is extremely grateful for the information provided by crematoria and hopes it will be of interest to them and provide a picture of an evolving cremation movement.

## Crematoria Booking Slots
