

Survey of Crematoria in the British Islands 2023

Each year, The Cremation Society carries out a survey of all crematoria in the British Islands, to track the latest information on up-to-date services and facilities offered. This enables us to follow any trends across crematoria and highlight any new practices emerging. Thank you once again to all crematoria for returning their data to us.

The following information is based on the data provided by 314 (out of 322) crematoria surveyed. From the 314 crematoria that responded, where no information was provided or the crematoria were unable to answer the question, this is shown as 'unknown'. Where an earlier

comparative figure is provided, this is based either on the earliest data published in *Pharos International* in 2007 or where a subject was not surveyed in 2007, then the earliest date for which information is available.
